Press Release

BioNimbus significantly expands capabilities into Manufacturing and Engineering Services

BioNimbus, Inc. of Fort Collins, Colorado welcomes Anthony Pilkington as **Vice President for Manufacturing and Engineering Services**.

Anthony received his degree in chemical engineering from CU in Boulder in 1988 and built an impressive career in GMP manufacturing, engineering, process development and plant construction and design.

His experience spans a variety of regulated and unregulated products and industries.

Anthony will bring this experience to bear by providing the BioNimbus clients with the following services:

- Design of lab facilities and equipment, taking the appropriate regulatory issues into account.
- Design, develop and optimize manufacturing processes, calculate needed capacities, scale-up to final batch size.
- Existing process troubleshooting and improvement.
- Planning expansion of laboratory and manufacturing capacity in an efficient way.
- AutoCAD drafting and design.
- Project management of all construction and expansion projects.
